I am a Software Engineering student at BINUS University (Binusian 2028) specializing in web development and digital product design. With a combination of UI/UX skills (Figma) and front-end development (HTML/CSS), along with a strong foundation in programming (C++, Java, PHP), I am accustomed to designing applications that strike a balance between user aesthetics and system logic. Supported by my proficiency in databases, VS Code, XAMPP, and CMD, I am ready to build functional and well structured digital solutions.

Projects

SafeRide - Web E-Ticketing & Security Platform

A desktop web-based e-ticketing platform that integrates a Gender-Based Seat Selection feature and an emergency reporting system to alleviate anxiety and enhance the safety of female passengers.

AI & IoT-Based Automatic Soil Irrigation System (Terradrop)

An ESP32- and AI-based precision irrigation solution for maximum water efficiency, supported by real-time automation and a remote monitoring dashboard.

Design of a Relational Database for a Freight Logistics Management System (3NF)

An end-to-end database design project for a package delivery logistics system. Decomposing the raw data structure (Unnormalized Form) through a series of normalization steps up to Third Normal Form (3NF) to eliminate data redundancy, prevent anomalies (insert, update, delete), and design a fully integrated Entity-Relationship Diagram (ERD).

Clash of baNG - Game Community Platform

An interactive community website for gamers, developed as a Human-Computer Interaction (HCI) lab project focusing on user experience.

Work Experience

Administration

PT ISUZU Astra Motor Indonesia | 08 August 2022 ~ 08 October 2022 (2 months)

Managed warehouse administration at PT Isuzu Astra Motor Indonesia, with full responsibility for entering tax documents, managing shipping documents via email, and verifying the accuracy of inventory data.

Education

Bina Nusantara University (BINUS)

Bachelor of Computer Science in Software Engineering | 2024 – Present (Binusian 2028)

SMK Taruna Bangsa

Vocational High School | 2021 – 2024

Soft Skills

- **Problem Solving:** Able to analyze problems and design logical structures for complex systems.
- **User-Centric Design:** Focused on user experience when designing application interfaces.
- **Administrative Accuracy:** Meticulous in managing company documents, tax matters, and inventory records.
- **Teamwork & Collaboration:** Experienced in collaborating on cross-functional projects spanning both technology and operations.

Hard Skills

- **Programming & Web:** C++, Java, PHP, HTML5, CSS3.
- **Database & Systems:** Database Design, Normalization (3NF), ERD, XAMPP, CMD.
- **Administration:** Tax Form Entry, Document Management, Product Data Verification.
- **Tools & Software:** Figma, VS Code, Email Management, Digital Scanner.
